ALL SEASON PANELS COLOUR PALETTE	

PERGOLA ALL SEASON[®]

Revolutionary and innovative, fully automated terrace roofing. Thanks to the use of most modern technological solutions, ALL SEASON CLIMATIC is simply the best solution for all gardens and terraces, both in private homes and commercial spaces.

Full control

The roof consists of aluminium louvres controlled in the range from 0° to 135°, allowing full control over sunlight and protection against precipitation. Thanks to the use of most modern technologies, the entire pergola and accessories can be controlled with a smartphone or tablet from anywhere in the world.

Durability

ALL SEASON CLIMATIC is made of the highest quality extruded aluminium and stainless steel, making it an all-year-round product with extraordinary resistance to external conditions. Unrivaled snow resistance -up to 5000kg for the maximum size of the pergola.

Functionality and innovativeness

ALL SEASON CLIMATIC offers an amazing possibility to integrate the most technically advanced accessories and fully automate the pergola. Most modern and integrated LED lighting, weather sensors, heaters and audio system controlled via Bluetooth are just some of many available solutions.

Security and privacy

Possibility to cover all pergola's sides with modern ALL SEASON SCREEN blinds, ALL SEASON GLASS sliding glass panels and ALL SEASON PANELS providing extra protection against all weather conditions, insects and significantly increasing privacy.

Aesthetics

Thanks to it's amazing aesthetic values, ALL SEASON CLIMATIC will be a great addition for every outdoor space. Hidden screw connections, very rich colours offer and impressive product finish are fully capable of meeting even the most demanding expectations.

Thanks to the built-in electric motor, it's possible to automatically control the roof louvres in the range from 0° to 135°.

90°

 \square

Internal louvres polystyrene filling minimises rain noise and provides additional insulation in hot and cold days.

Thanks to the use of the smart control panel, it's possible to control the pergola and all additional accessories with a smartphone or tablet.

135°

www.allseasonpergola.com

Thanks to the optional use of modern ALL SEASON SCREEN blinds, system gains additional benefits of better protection against sunlight, insects, enhanced privacy and improved thermal properties. Very rich colours palette matching pergola's structure and impressive blinds sizes - up to 7000mm

ALL SEASON GLASS PANELS

ALL SEASON GLASS is an amazing combination of optimal visual and thermal comfort and protection against external conditions. Thanks to the use of 10mm toughened glass and unique, innovative technological solutions, the system ensures the safe use of every terrace's space, both at home and commercial properties. Wide selection of accessories, casing colours and glazing models will make ALL SEASON GLASS perfectly fit into any surroundings and meet even the most demanding expectations.

EATERS

4 heaters models available with power regulation, controlled via smartphone or tablet. Maximum power: 1500W. Casing made of extruded aluminium, available in two colours.

INTEGRATED AUDIO SYSTEM

2 built-in 23W/80hm speakers, available in two colours and controlled via special audio app through Bluetooth.

Impressive LED lighting configuration and integration options within pergola's structure: in the gutters or roof louvres. Available LED strips: WHITE, RGB or RGBW.

SMART CONTROLS

Thanks to the use of a smart control panel, there is a possibility to control the pergola and all its accessories with a smartphone or tablet, from any location in the world.

C WATER DRAINAGE

Every ALL SEASON CLIMATIC pergola is equipped with an innovative water drainage system integrated and hidden within the structure.

AUTOMATIC ROOF CONTROL $\widehat{1}$

Adjustment of aluminium roof louvres, that can be turned in the range of 0° to 135° by remote control, smartphone or tablet. Full control over incoming sunlight and precipitation.

RESISTANCE TO ATMOSPHERIC * CONDITIONS

Snow resistant design with one of the best results in the world - ALL SEASON CLIMATIC can easily handle a 5000kg snow load at max available pergola size. It's also resistant to other weather conditions such as wind, rain and sun.

TESTED STRUCTURE 👌

Very solid frame ensures high resistance to loads coming from heavy snowfall, rainfalls or strong winds. Application of extra strengthening chambers, reinforced and special shaped profiles make ALL SEASON CLIMATIC one of the most durable pergolas available on the market.

MATCH THE COLOUR FROM OUR PALETTE

Rich standard offer pergola colours: 3 colours in standard ALL SEASON CLIMATIC palette and 10 extra in the additional one. Possibility of choosing any RAL, TIGER, anodised or wood-like colour will allow perfect pergola adaptation to any environment.

MADE TO MEASURE DESIGN

Highly aesthetic fixings, no visiblescrew joints, hidden motors and perfectly matched accessories, make ALL SEASON CLIMATIC a truly remarkable and uniquep roduct.

WEATHER SENSORS ((•))

Possibility to connect most modern wind, rain, temperature and snow sensors, additionally strengthening pergola's resistance to weather conditions.

ADDING ALL SEASON[®] TOUGHENED GLASS SLIDING PANELS SYSTEM TO ALL SEASON CLIMATIC PERGOLA

ALL SEASON GLASS is an amazing combination of optimal visual and thermal comfort and protection against external conditions.

Thanks to the use of 10mm toughened glass and unique, innovative technological solutions, the system ensures the safe use of every terrace's space, both at home and commercial properties.

Wide selection of accessories, casing colours and glazing models will make ALL SEASON GLASS perfectly fit into any surroundings and meet even the most demanding expectations.

Why ALL SEASON GLASS is the best choice?

- 5 casing colours included in the standard offer possibility of powder coating in any colour from the RAL palette,
- 7 glass types, variety of colours to choose from,
- first panel lock extra security,
- 3, 4, 5, 6 tracks with one-sided and two-sided sliding,
- system width from 2 000 to 13 200 mm,
- extra brushes, seals added to the panels to increase insulation and protection against weather conditions,
- ALL SEASON GLASS is always delivered as a complete product, ready for fitting -glass glued to the bottom profiles !

ALL SEASON[®] EXTERNAL SCREEN BLINDS TO ALL SEASON CLIMATIC PERGOLA

ALL SEASON SCREEN external screen blinds is a modern covering product, perfectly fitted for ALL SEASON CLIMATIC pergola.

ALL SEASON SCREEN is a great protection and barrier against excessive sunlight and weather conditions.

ALL SEASON SCREEN blinds reflect as much as up to 95% solar energy and thus allow you to save extra money on artificial lighting. Our blinds not only provide optimal visual and thermal comfort, but also act as protection against insects and wind. Thanks to that, all users can enjoy a peaceful private zone, staying connected with the outside environment at all times.

All models available in 10 standard colours matching ALL SEASON CLIMATIC pergola's structure.

Possibility to control the blinds and pergola using one remote control, tablet or smartphone.

25-

COMBINATION OF ALL SEASON CLIMATIC PERGOLA WITH SLIDING PANELS SYSTEM

ALL SEASON PANELS

-26

Thanks to the additional use of ALL SEASON PANELS modern system, ALL SEASON CLIMATIC pergola gains additional benefits in the form of full sun protection, increased privacy and thermal properties.

Thanks to the extremely wide colour palette available, the whole can be made in the same colour, which additionally enhances incredible aesthetic qualities ALL SEASON CLIMATIC.

COMPATIBILITY OF SYSTEMS WITH ALL SEASON CLIMATIC PERGOLA

27 —

ALL SEASON CLIMATIC can be perfectly combined together with ALL SEASON SCREEN blinds, ALL SEASON GLASS and ALL SEASON PANELS system

Thanks to the additional use of these modern systems, ALL SEASON CLIMATIC gains extra benefits such as full protection against sunlight, enhanced privacy and thermal properties.

Thanks to a very wide range of available colours, all elements can be made in the same colour, which additionally strengthens the already amazing aesthetic ALL SEASON CLIMATIC values.

- Very modern, waterproof and stylish LED lighting.
- Available in many configurations can be integrated with the louvres or pergola's gutter.
- Quick and easy control from your smartphone, tablet or remote control.

WEATHER SENSORS AND AUTOMATION

WIND SENSOR

Constantly monitors the wind speed - when excessive wind is detected, the sensor will automatically open the pergola and attached ALL SEASON SCREEN blinds.

RAIN SENSOR

When rain is detected, the sensor will automatically close pergola's roof. Heating function included in order to avoid activation in the event of snow or ice detection.

BLACK / RAL 9005

HEATERS

Pergola can be equipped with heaters, which will keep you warm during cool spring mornings and autumn evenings.

Built-in Low Glare emitter - the device does not dazzle the eyes.

*

TEMPERATURE SENSOR

Temperature sensor will slightly open the louvres at +3 $^{\circ}\mathrm{C}$ temperature drop protecting them from icing resulting in seals damage and roof immovilization. Sensor can be turned off using the remote.

SNOW DETECTION SENSOR

Snow sensor = rain sensor + temperature sensor In the event of detecting precipitation and temperature lower than +3 °C at the same time, the sensor will interpret it as snow and automatically open the louvres at 90° angle.

REMOTES

Simple and functional 63-channel remote to control everything:

- ✓ 9 product groups:
- pergola roof control,
- ALL SEASON SCREEN blinds
- control,
- LED lighting control,
- heaters control,
- audio system control.
- ✓ Protection factor: IP20.

WHITE

INTEGRATED BLUETOOTH AUDIO SYSTEM

Easy and quick access to your favourite music, whenever you want.

System is operated via Bluetooth technology, allowing practically every phone to be connected. Music can be played from any application.

Snow load test carried out on a free-standing 6900x6000mm two-module structure, without the supporting post, showed the resistance of the whole structure to the level of 120,78kg/m2, which gives a total load of 5000 kg pressing pergola's roof. Detailed test description is available at company's sales department.

WATER DRAINAGE FOR 2 SUPPORTING POSTS

Based on PN-EN-12056-3 norm, below values were determined for water drainage from pergola's structure and louvres, based on 0,03 l/(s*m2) rainfall intensity. Water flow rate through open supporting posts with inspection flaps and internal sewage pipes with a diameter of 50mm is 2.0 l/s. In the event of a heavy rainfall, roofed structure drains 65 l/m2/h.

www.allseasonpergola.com

www.allseasonpergola.com

The ALL SEASON CLIMATIC SLIDE sliding roof pergola provides fully adjustable sunlight intensity thanks to a modern, fully automatic roof with folding louvres. The protection from excessive sunlight by regulating the level of openness of the roof is only one of the many advantages of this system. Pergola ALL SEASON CLIMATIC SLIDE makes it possible to regulate the temperature inside the structure by opening the louvres or protect against precipitation when closed.

ALL SEASON CLIMATIC SLIDE is the ideal solution for hotels, private houses, restaurants, bars, leisure and entertainment centres. A full range of colours and additional options, gives the possibility to adjust the pergola to any, even the most demanding environment. The unique design, applied solutions and highest quality components comb ineinto an extremely durable, functional product, which is able to meet even the most demanding expectations.

DURABLE AND FUNCTIONAL ROOF LOUVRES

The roof louvres change their angle of inclination as they move from 0° to 110°, providing an additional opportunity to regulate the level of sunlight intensity. Reinforced louvres structure allows the production of pergolas up to 4m wide.

STURDY CONSTRUCTION

The ALL SEASON CLIMATIC SLIDE is made from the highest quality aluminium components and stainless steel. Thanks to the use of 6063 T5 type aluminium, the structure is extremely resistant to the influence of conditions, including wind, snow and rain.

REMOTE CONTROL

Each ALL SEASON CLIMATIC SLIDE pergola is equipped with a modern radio-controlled motor with the included remote control or via Wi-Fi.

Adjusting the angle of the louvres, opening/closing the roof, adjusting light intensity are just some of the functions you can use in a convenient way, using a remote control, phone or tablet.

MAX. HEIGHT	2400 mm

RZ-89-ZIP is a universal model of external/ facade roller blind in a self-supporting box with ZIP guide rails. The fabric is inserted and stretched in special two-piece guides, using zipper technology. ZIP system guarantees perfect fabric tension, thanks to which our roller is very stable, wind and insect proof. External roller blinds are designed for direct fitting in the window recess – window joinery, outside the window recess – to the wall. In this regard, they are similar to external aluminum roller blinds or facade blinds. Only 90° box shape is available in 89mm size. Maintenance flap is located at the front of the roller blinds box which enables easier servicing. The box profile and guide rails are made of extruded aluminum, which allows us to manufacture products up to 3000 mm width and 2400 mm height.

CONFIGURATION EXAMPLE

www.allseasonpergola.com

RZ-103-ZIP is a universal model of an external/ facade roller blind in a self-supporting box with ZIP guide rails. The fabric is inserted and stretched in special two-piece guides, using zipper. ZIP system guarantees perfect fabric tension, thanks to which our roller is very stable, wind and insect proof. External roller blinds are designed for direct fitting in the window recess – window joinery, outside the window recess – to the wall. In this regard, they are similar to external aluminum roller blinds or facade blinds. The 103 mm box has three shapes: 45°, 90° and oval. Maintenance flap is located at the front of the roller blinds box which enables easier servicing. The box profile and guide rails are made of extruded aluminum, which allows us to manufacture products up to 5000 mm width and 3000 mm height.

500 mm		
5400 mm		
500 mm		
6000 mm		

RZP-131-ZIP is a version of an external roller blind with ZIP guide rails designed for installation with the maintenance flap located at the bottom of the box allowing for much easier servicing. The used fabric is inserted and stretched in special two-piece guides, using zip technology. The fitting bracket in the front of the box allows any types of plastering to be used. Our box profile can be plastered and insulated from every side, leaving only the maintenance flap at the bottom. The special construction of the guide rails enables their partial built-in installation, thanks to which the whole system blends in perfectly with the building facade. Only 90 ° box profile type in 131 mm size is available, thanks to small size of the box we can apply insulation from 140 mm – 150 mm thick. The guide rails are made of extruded aluminum, while the box is made of cold-bended aluminum sheet, which allows us to manufacture products up to 5400 mm width and 6000 mm height
